Dear Sir

I have completed the revisions requested by the DDR committee in both the dissertation (Chapters 1–3) and the defense PowerPoint. A short account of what changed is below.

1. Hypotheses in If–Then form
H1–H4a in Chapter 1 were already If–Then. H4b is now: If estate size increases from 100 to 5,000 services in the pre-registered scaling sub-study, then Plane-2 latency and CpR will remain within the design-committed SLO bounds. Chapter 3, Table 3: every A-H, B-H, and E-H row is now If–Then. Variables, direction, tests, and the split between confirmatory and exploratory families are unchanged. Holm–Bonferroni families were not merged.

2. User study specified in Chapter 3
The 24-participant study is now a dedicated subsection, Exploratory Human Evaluation (Research Question 4). It covers mixed composition (practitioners, academics, business/operations), recruitment, conditions (HELIOS-Full vs HELIOS-noExpl), tasks, measures, analysis (E-H7), and limits. It is exploratory only; n = 24 is not treated as population evidence.

3. Business layer in Chapter 3
A Business Evaluation Layer now sits after Research Setting. It maps technical outcomes (HR@3, MTTR, CpR, TTT, decision quality) to organizational value after deployment, and states that laboratory results do not invent a firm-level saving.

4. Citations and APA presentation
In-text citations in Chapters 1–3 are Zotero citekeys. Headings (levels 3–5), table/figure captions, page numbers, and US English spelling follow APA 7 / GGU. The PDF order is title page, Table of Contents, then List of Tables as a separate index (listed last in the Contents).

5. Defense deck
• Author–year citations on claim slides, including slides 3–6 (context, stakeholders, RCA difficulty, economics).
• New slide: Business Evaluation Layer (same mapping as Chapter 3).
• Two consolidated reference slides (DSR/methods; benchmarks and prior RCA).
• RQ4 on the deck now states n = 24 mixed (SREs, academics, business).

I am ready to send the revised chapters and deck to the committee. I will schedule our discussion for this week to discuss the next step.

Kind regards,
Akshay Adik

Hi Sir,

Based on slot availability, I have scheduled this month's discussion today at 7:00 PM. I hope this time works for you.

Thanks & Regards,
Akshay
